Some key characteristics of agentic AI include:

1. **Autonomy**: Agentic AI systems can operate independently, making decisions without human intervention.
2. **Self-awareness**: They have a sense of their own existence, goals, and motivations.
3. **Goal-directed behavior**: Agentic AI systems are designed to achieve specific goals, which can be set by humans or emer

Hello. How can I assist you today?

Agent Answer:
However, I'm a large language model, I don't have real-time access to current weather conditions. But I can suggest some way

1. **Check online weather websites**: You can visit websites like AccuWeather, Weather.com, or the National Weather Service
2. **Use a mobile app**: Download a weather app on your smartphone, such as Dark Sky or Weather Underground, to get current
3. **Tune into local news**: Watch local news or listen to the radio to get the latest weather forecast.
4. **Check social media**: Follow local weather accounts on social media platforms like Twitter or Facebook to get updates c

If you provide me with your location, I can try to give you a general idea of the weather based on historical data.
